

RIO STOCK TRADING GBP

1 August 2024

MANAGER COMMENTS

RIO Stock Trading GBP posted a return of 1.23% during July. I am proud to say that this investment continues with a perfect trading record this year, having filed seven consecutive gaining months. The returns reported over the three- and five-year periods are 64.64% and 116.99%, respectively. The risk/reward ratio is also very attractive, analysed over the past 24-month period, this is 27.07. The risk/reward calculation is a division of the net profit (the reward) by the price of the maximum risk taken. A risk- reward ratio of 4 is considered reasonable, so above 8 is excellent; but 27.07-1 certainly sets this investment in a class of its own.

Market comment - The Bank of England cut UK interest rates on Thursday to 5%, the first cut in more than four years, but UK stock markets barely moved on the decision. The reason being that the UK stock market is driven 80% by earnings offshore. So, there is a weak link between UK interest rates and the earnings of the UK stock market. It is much more of a company specific question, and while there are some domestic opportunities its direct link with the UK stock market is not that strong.

INVESTMENT OBJECTIVE

RIO Stock Trading GBP is a high-risk trading platform through which RIO can invest in currency, UK equities, and the commodity market. The account may also invest in other high-risk traded securities, where the potential gains are deemed to be in line with the risk-reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of between 2-3 years due to the expected short-term volatility.

As an active investment specialist, market volatility can create a prime investment opportunity and RIO expects further volatility, especially against the current backdrop. Geopolitical tensions are at fever pitch as the effects of Russia's invasion of Ukraine make negotiations tense. The knock-on effects of this are reflected in the stock values of UK-listed companies.

RIO Stock Trading GBP will focus predominantly on trading those entities listed on the FTSE 100 index and has already identified several trading opportunities.

Please note that this investment is only suitable for those prepared to accept the additional risk, in exchange for the potential reward.

INFORMATION

NAV	343.10
Launch Date	June 2016
Investment Manager	William Gray
Currency	GBP
Minimum Investment	10,000

CUMMULATIVE PERFORMANCE (Five Years)

This document is not an offer of investment. Subscriptions for shares can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the investment objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.
