

RIO STOCK TRADING GBP

1 November 2022

MANAGER COMMENTS

RIO Stock Trading GBP continues its exceptional gain since the start of the year, up 22.05%. The FTSE, in comparison, has registered a loss of 3.93% over the same period. Looking back, this high-risk equity investment was first launched in June 2016; members who have remained invested since inception have seen awe-inspiring returns, with the net return to date being 172.67%. Incredible!

The UK Market - RIO's in-depth research has uncovered that more money flowed out of UK equities this year than any other point on record; but nothing goes down in a straight line, and I have traded this volatility relatively well, banking gains throughout 2022. After one of the most turbulent and chaotic periods in British political history, UK stocks, it has to be said, are now the cheapest on record compared to their global peers. The heard investor has been selling all this year, but due to the above, the trend has really accelerated. This is excellent news, as consistent selling has pushed UK equity valuations to the lowest on record compared to global peers. Our analysts agree that the average forward price/earnings (p/e) ratio of companies in the UK is around 8.7, and in the US, it's 16.4.

INVESTMENT OBJECTIVE

RIO Stock Trading GBP is a high-risk trading platform through which RIO can invest in currency, UK equities, and the commodity market. The account may also invest in other high-risk traded securities, where the potential gains are deemed to be in line with the risk-reward ratio, at the discretion of the investment manager. The trading strategy favours a midterm investment of between 2-3 years due to the expected short-term volatility.

As an active investment specialist, market volatility can create a prime investment opportunity and RIO expects further volatility, especially against the current backdrop. Geopolitical tensions are at fever pitch as the effects of Russia's invasion of Ukraine make negotiations tense. The knock-on effects of this are reflected in the stock values of UK-listed companies.

RIO Stock Trading GBP will focus predominantly on trading those entities listed on the FTSE 100 index and has already identified several trading opportunities.

Please note that this investment is only suitable for those prepared to accept the additional risk, in exchange for the potential reward.

INFORMATION

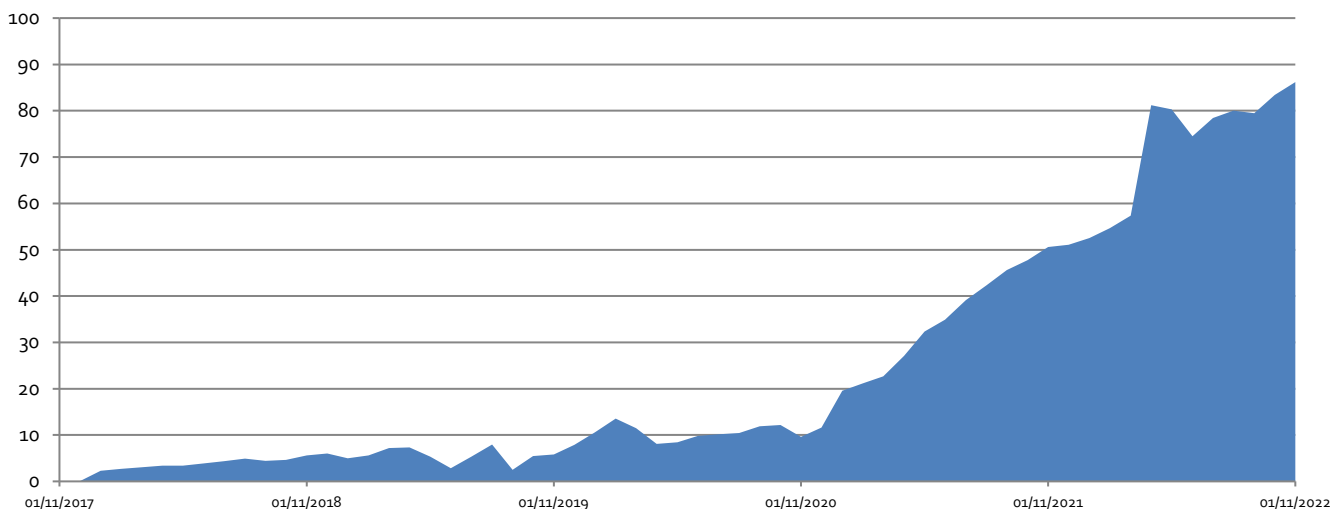

NAV	272.67
Launch Date	June 2016
Investment Manager	William Gray
Currency	GBP

CUMMULATIVE PERFORMANCE (Five Years)

This document is not an offer of investment. Subscriptions for shares can only be made on the basis of the current literature and The RIO Club operates strictly on a referral only basis. Past performance is not a guide to future performance and there can be no assurance that the investment objective(s) will be met. The value of investments and the income from them can fall as well as rise and is not guaranteed. Investors may not get back the full amount invested. This investment is high risk and is very likely to experience volatility, it is designed for members who accept a high level of risk for a potential high gain over the mid to long term. Changes in the rates of exchange between currencies may cause the value of investments to diminish or increase. Current tax levels and reliefs may change and depending on individual circumstances this may affect the investment return. For further information please refer to the terms and conditions.

ASSET ALLOCATION (%)

VOLATILITY & RISK (24 Months)

Annualised Volatility	16.49%
Return for Period	69.81%
Best Monthly Return	15.16%
Worst Monthly Return	-3.23%
Risk / Reward Ratio	21.62:1

The risk/reward calculation is a division of net profit (the reward) by the price of your maximum risk. Any investor should determine their acceptable risk, but it is always best to be more conservative with risk than aggressive with reward.
